

HUZAIFA MUMTAZ

Full Stack Software Engineer

+92 343 3613211 · huzaifamumtaz09@gmail.com · [GitHub](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

Full stack software engineer with production experience across Python/FastAPI backends and React-based frontends, currently building microservices for an AI-powered multilingual translation platform. Comfortable owning features end-to-end from REST API and database design to UI integration, and has hands-on experience evaluating and integrating third-party AI/ML providers (speech-to-text, audio separation) into production pipelines. Strong SQL and relational database background, Agile/JIRA workflow experience, and a track record of independently scoping and shipping work.

EXPERIENCE

Associate Software Engineer — Wamo Labs

Dec 2025 – Present

Backend/full-stack developer on a production microservices application for AI-powered multilingual translation, building REST APIs, integrating third-party AI/speech providers, and running technical benchmarks that inform architecture decisions.

- **Self-Service authorization system:** designed and shipped a plan-based authentication and authorization feature end-to-end in FastAPI, with role- and plan-level access control, enabling users to self-manage subscriptions.
- **AI/ML provider evaluation:** benchmarked Speech-to-Text and audio separation providers across accuracy, latency, cost, and voice-isolation quality, producing structured evaluation reports that directly informed AI provider selection for the translation pipeline.
- **Production debugging:** resolved bugs across multiple FastAPI microservices, tracing issues through service boundaries and shipping fixes covered by regression tests.
- **REST API & backend development:** built and maintained REST APIs within an established microservices architecture, following patterns for request validation, error handling, and response contracts.
- **Agile delivery:** worked in an Agile/JIRA environment, broke down feature work into scoped PRs, participated in sprint planning, and maintained documentation for cross-team handoffs.

PROJECTS

Project Handler — Full-Stack Management Dashboard — Personal Project

Sep 2023

- **Full stack build:** developed a full-stack project management tool using a React.js frontend, Node.js backend, and MongoDB database.
- **APIs & analytics:** built integrated analytics APIs powering live dashboards, covering the same React/Node/REST API stack used in modern production web apps.

Knowledge-Based System — Unani Medicine Formulations — University Project

Jul 2024 – May 2025

- **Data & ETL:** designed data models and built ETL pipelines to integrate structured medical data into a searchable knowledge-based system.
- **Team delivery:** collaborated in a team of 3, owning data transformation and schema design end-to-end; built a user-friendly interface for researchers and general users.

EDUCATION

B.Sc. Computer Science — University of Engineering & Technology, Lahore

Nov 2021 – May 2025

Relevant coursework: Data Structures & Algorithms · Artificial Intelligence · Database Systems · Applied Probability & Statistics · Linear Algebra · Software Quality Engineering

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C#, C++

Frontend: React.js, Next.js, HTML/CSS

Backend: Node.js, FastAPI, REST APIs, Microservices, .NET

AI/LLM & Integrations: Third-party AI/speech provider integration & benchmarking (STT, audio separation)

Databases: MySQL, SQL Server, Oracle, MongoDB, Prisma ORM

Auth & Security: Plan-based Authorization, Authentication Systems, Role-based Access Control

DevOps & Tooling: Docker, GitHub, Agile, JIRA, VS Code
